Key Residential Learning Community Cluster Information

Step 1: Inform your Academic Advisor that you are in the **Key Residential Community**.

Step 2: With the support of your Academic Advisor**, choose ONE** cluster that best serves your interests and major and register for **ALL** of the courses within that cluster.

Whose Story (9 CREDITS)

Key Seminar Class Description: "Whose Story" examines United States history from the perspective of non-dominant groups' stories. It asks students to think deeply about who is allowed to tell the stories of the past as well as how and why telling only the stories of those in power is inadequate at best and harmful at worst. This discussion driven class will focus on primary and secondary historical sources – especially non-traditional sources including oral histories and family stories, music, art, photographs, physical landscapes/places, etc. Each student will also complete a class project. These projects will allow for students to learn about and practice "doing history" by creating their own oral histories. In addition, students will have the option to present their projects in creative ways.

Diversity, Inclusion & You (6 Credits)

Key Seminar Class Description: Have you ever wondered why people do and think the things they do? Through exploration of our lived experiences as a part of larger social system of US culture situated in a global context, we will seek to understand answers to this question. We are all on a journey to overcome barriers, acknowledge privilege and understand/navigate systems of oppression. However, we need to learn about the environment that influences our journey. Today is the start of that journey!!! Using theories, critical reflection and dialogue as a tool for learning and education we will explore equity, diversity, inclusion and sense of belonging to pro-

MULTIFAITH & BELIEF ENGAGEMENT (9 CREDITS)

Key Seminar Class Description: The goal of the course is to explore ways that difference of belief causes both division and cooperation. This course uses three main strategies to achieve this goal: 1) developing appreciative knowledge about a diversity of beliefs, 2) exploring students' own spiritual/philosophical/religious or non-religious values, and 3) learning and practicing effective communication practices across difference, such as interfaith dialogue.

Create Your Story (6 Credits) - Exploratory Studies Students Only

This course will use students' personal narratives as a tool to reflect on their values, interests, goals, and identities, as well as their impact on their academic decisions at CSU as they experience their first year of college. We will investigate a variety of personal narratives from various cultures, creative nonfiction and memoirs, as well as visual and oral narratives. Students will explore how their story fits within potential programs of study at Colorado State University, as well as review in class and implement best academic practices for students' success at the university.
